

A Attribution: the correction gain is a released hold

Gemini 2.5 Flash, same saved proposals

Final-state reading: evidence checks add 33 points.

Replay: ALLOW recovers the same 11 corrections; in 16 of 17 traced holds, the corrected tuple was missing from both fact lists.

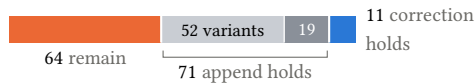

B Specification: most avoided violations are variants

21 configurations, same saved REVIEW proposals

Final-state reading: the gate cuts violations from 146 to 64.

Replay: 71 of the 82 come from append holds shared by every rule; 52 of these hold a variant of a required fact.

REVIEW: 146 reference violations; the gate avoids 82

Variant: a required fact written with a different subject label, spacing, or value form.

C Opportunity: ties between rules are zero exposure

Configurations whose proposals reach the held set H

Final-state reading: the rules are equivalent.

Replay: on hollow configurations no proposal reached H , so the rules were never compared on a decision.

Controlled-path proposals 12 of 21 unexposed

REVIEW proposals 16 of 21 unexposed

same 21 configurations in both rows
